MERİDYEN TEL

Örgü tel, kafes teli, dikenli tel, Pvc kaplı tel, Jiletli tel ve Panel çit imalatı satışı ve montajı alanında faaliyet göstermektedir. Çiftliklerden tarım alanlarına, (tarla, bağ, bahçe, meyvelik, hobi, okul ve hayvanat bahçeleri) Spor sahalarından (Halı saha, stadyum, basket ve voleybol sahası, oyun alanı) park ve gezi alanlarına, arsa, Villa, apartman, site ve konut çevrelerinden sanayi tesislerine (Fabrika, depo) gibi bir çok yerde kullanılan her türlü tel örgü ve çit sistemlerinin montajını yapıyoruz.

manufacturing of , sales and installation of galvanized wire mesh, cage wire, barbed wire, PVC coated wire, razor wire and panel fences. We install all kinds of wire mesh and fence systems used in many places such as farms, agricultural areas (fields, vineyards, gardens, orchards, hobbies, schools and zoos), sports fields (astroturf pitch, stadium, basketball and volleyball courts, playgrounds), parks and recreation areas, land, villas, apartments, sites and residential areas, industrial facilities (factories, warehouses).

Wire fence systems are environmental security and protection systems. Wire fences are a protection against wild and domestic animals in rural areas and a precaution against strangers in city centers. Mesh wire, barbed wire and razor wire fences are the most commonly used wire fence types in lands. Panel fences and grass fences are used in city centers. Grass fences in particular are at the forefront of fence systems that have become very popular in recent years. Wire fence systems do not harm any living being or nature while being applied. On the contrary, they fulfill the task of protecting nature from unwanted effects and dangers.

Tel çit sistemleri çevre güvenlik ve koruma sistemidir. Tel çitler kırsal alanlarda yabani ve vcil hayvanlara karşı korunak, şehir merkezlerinde yabancı insanlara karşı önlemdir. Örgü tel, dikenli tel ve jiletli tel çitler arazilerde en çok kullanılan tel çit çeşitleridir. Panel çitler ve çim çitler ise şehir merkezinde kullanılır. Özellikle çim çitler son yıllarda fazlaca rağbet gören çit sistemlerinin en önünde yer almaktadır. Tel çit sistemleri uygulanırken hiç bir canlıya veya doğaya zarar vermez. Aksine doğayı istenmeyen etkilerden ve tehlikelerden koruma görevini yerine getirir.
